Locating a Camera in Live View

1) Navigate to the Search bar on the left-hand column and enter part or all of the camera name.

2) Multiple cameras may be listed in the results - hold the cursor over each camera to view a thumbnail of the view.

3) Click the desired camera name to display the live view in the viewing window.

4) You can quickly access recorded video by right clicking a camera, navigating to **Recorded Video**, and selecting either **Search By List** or **Search By Thumbnails.** (See the Playback section for more information on searching footage)
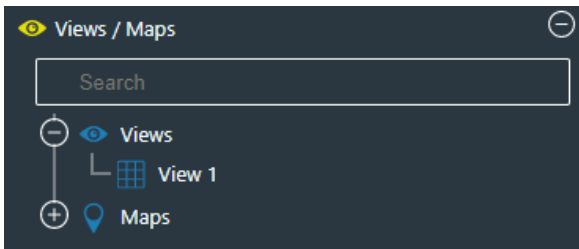

Pre-made Views

Pre-made views for frequently used areas of campus are accessible by expanding the **Views** tab on the left-hand column.

1. Click the small **+** to expand the views tab on the left-hand column.
2. Pre-made views for your building will populate underneath.
3. Click the desired view.
4. Double click any of the cameras to bring them to full screen and double click again to go back to the previous pre-made view.

- If your area would like to establish a view of certain frequently-used cameras, please send a request with the specific camera names to campusaccess@uky.edu.

Playback

1. Video can be searched multiple ways.
   a. Right clicking a camera in **Live View**.
      i. This will bring up a menu. Navigate to Recorded Video, and select either **Search By List** or **Search By Thumbnails.**
   b. Clicking **Playback** at the top of the Web Client.

2. Search Video by entering the required information. This will include:

1) Select the Server
2) Select the Camera to be searched
3) Enter the Start Time
4) Enter the Start Date
5) Enter the End Time
6) Enter the End Date
7) Select the Time Zone (if necessary)
8) Click Search
9) Optionally, select Show/Hide Video to display or conceal the video playback pane

3. Alternatively, you can select the camera from the left side panel to automatically insert the information into the server and camera fields
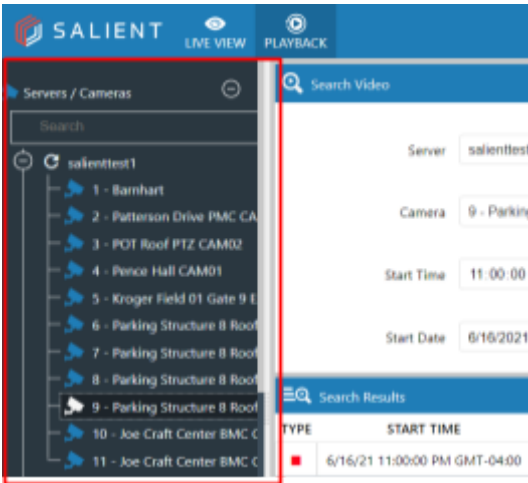

4. After clicking the Search button, results will appear in a list, displaying all blocks of footage during the selected time parameters.
 Red Squares indicate recorded motion events.

 Green Squares indicate continuous recording.

5. Click on an event to review the recording in the video preview screen.

6. Click the Thumbnail button to see the footage broken down in hour increments.

Video footage is retained for 30 days. Attempts to view footage beyond that time frame will result in an error in the system.
